01

Landing page

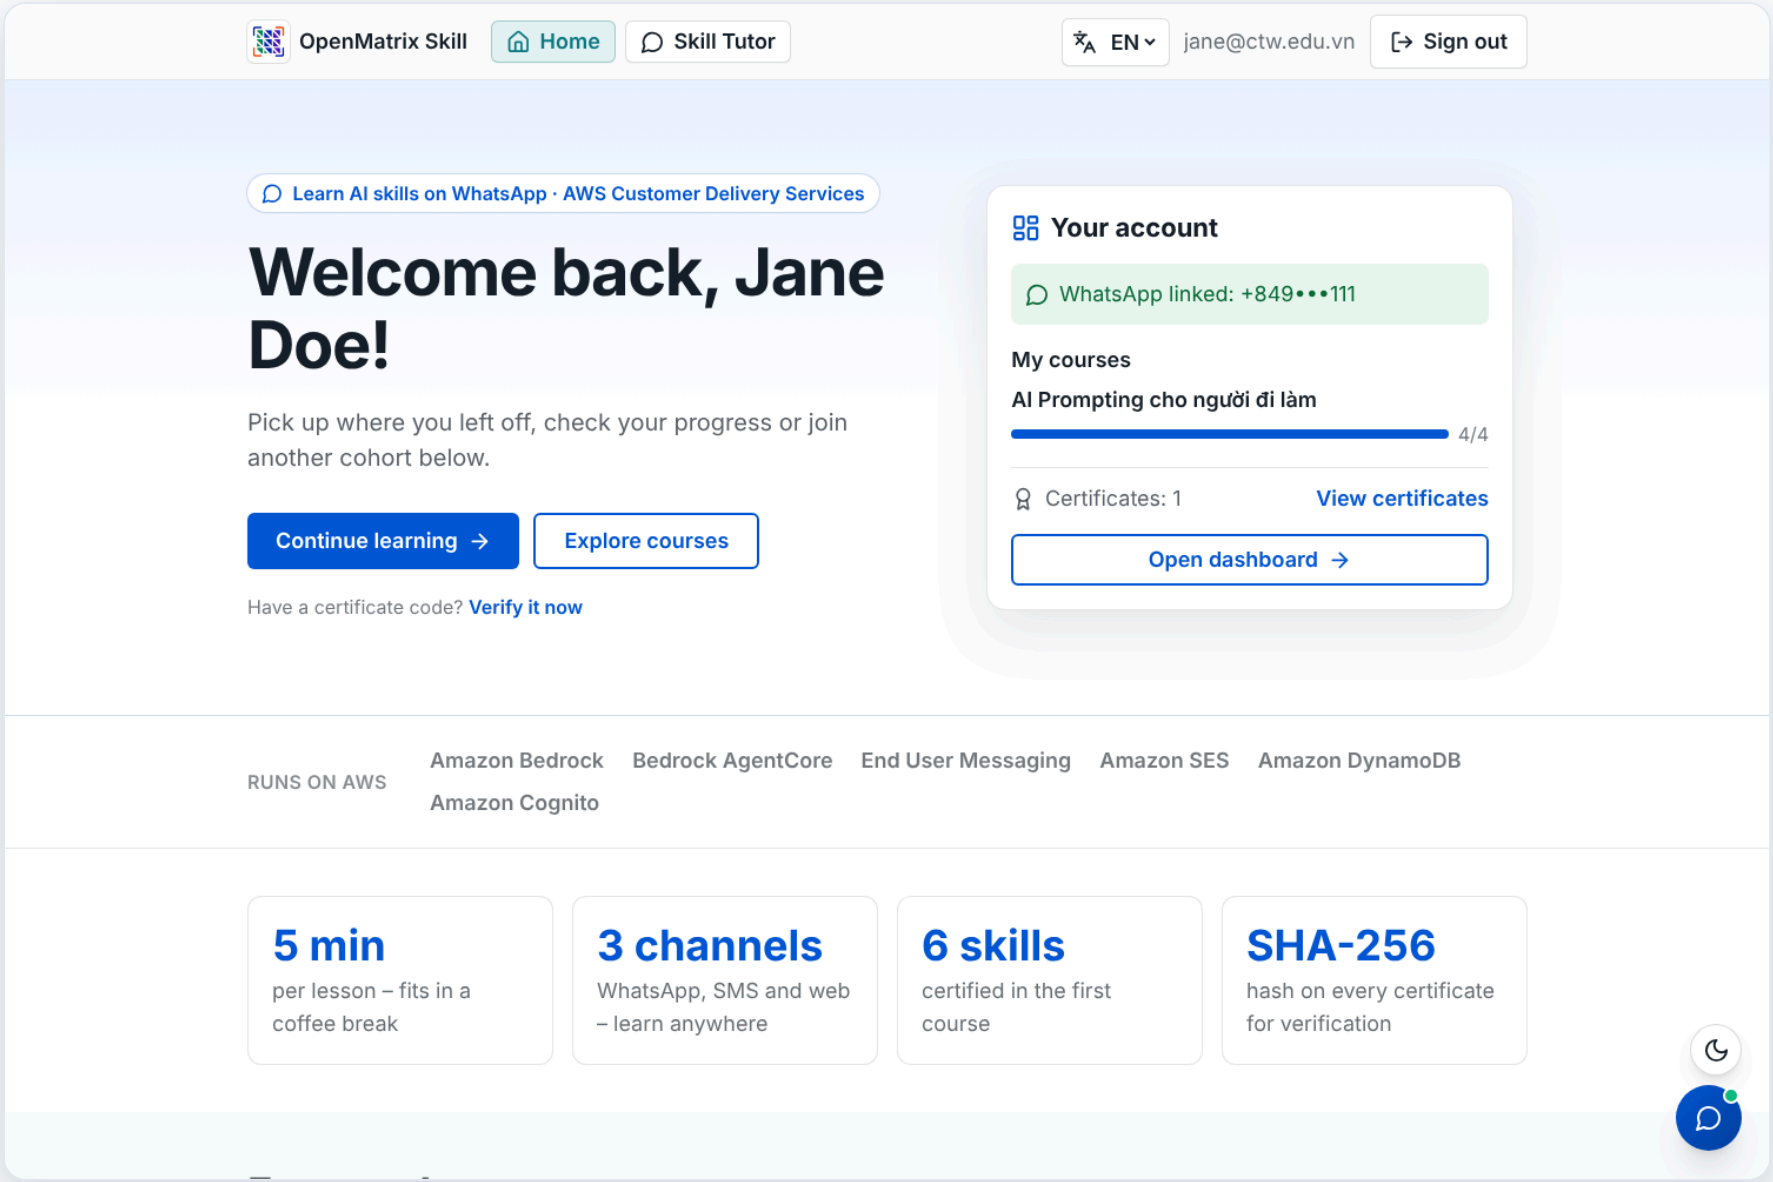

Learn a new skill in 5 minutes a day, right inside WhatsApp.

02

Signed-in landing

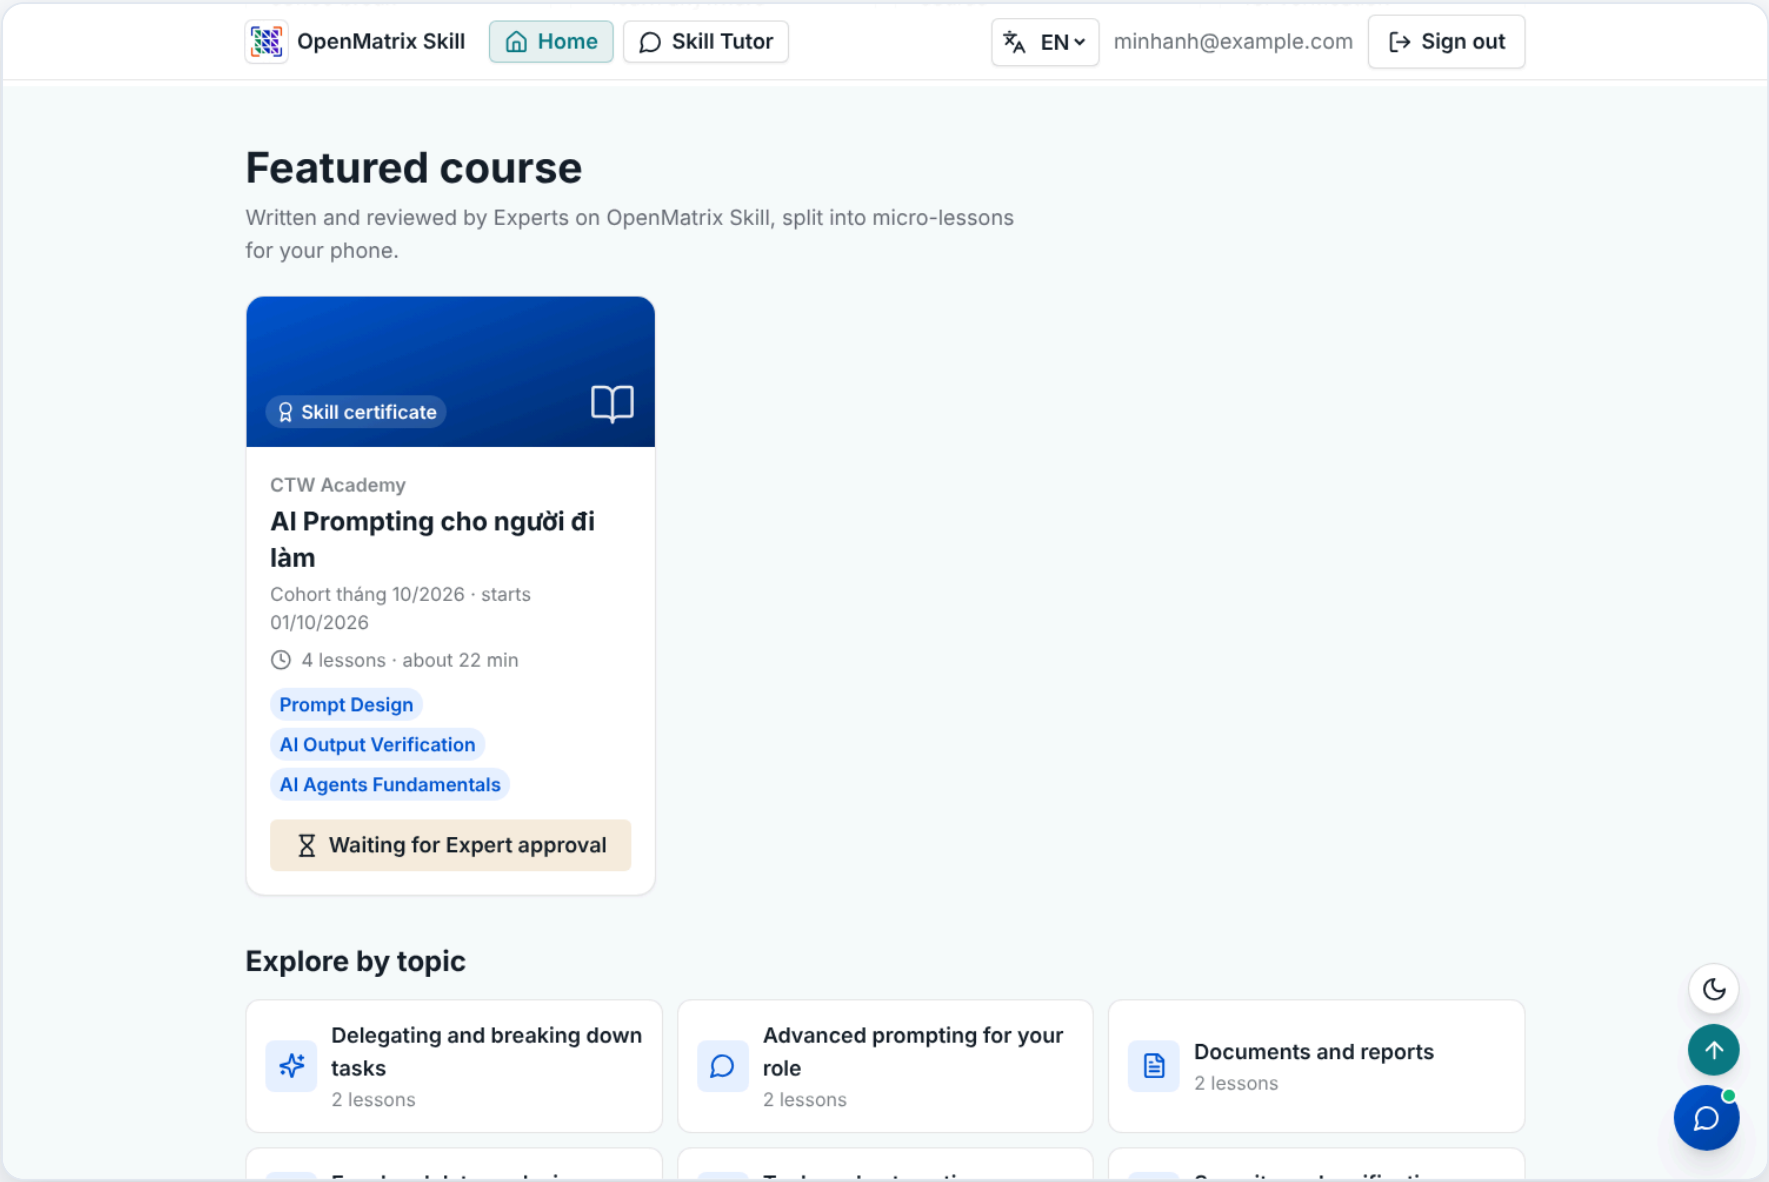

Your account: WhatsApp link status, enrolled courses with progress, certificates.

03

Course catalogue

Real cohorts from OpenMatrix Skill; request to join, admin approves.

04

WhatsApp lesson

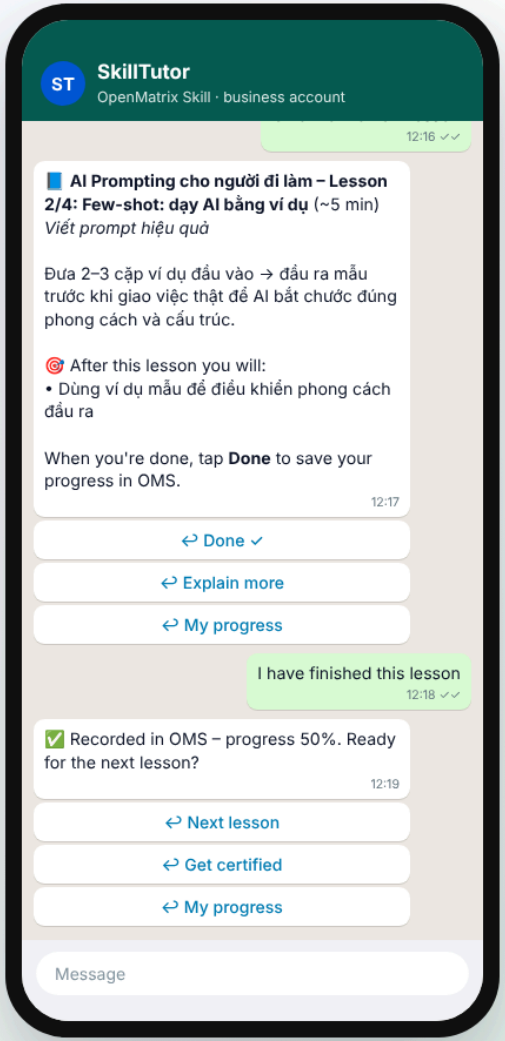

Micro-lesson with reply buttons (Done ✓ / Explain more / My progress) sent through AWS End User Messaging Social.

AWS End User Messaging Social · WhatsApp

Micro-lessons inside WhatsApp

Micro-lesson with reply buttons (Done ✓ / Explain more / My progress) sent through AWS End User Messaging Social. Tapping Done records progress in the OMS course.

Rendered from the exact message payloads SkillTutor sent with SendWhatsAppMessage in a dry-run session (demo course).

05

WhatsApp quiz

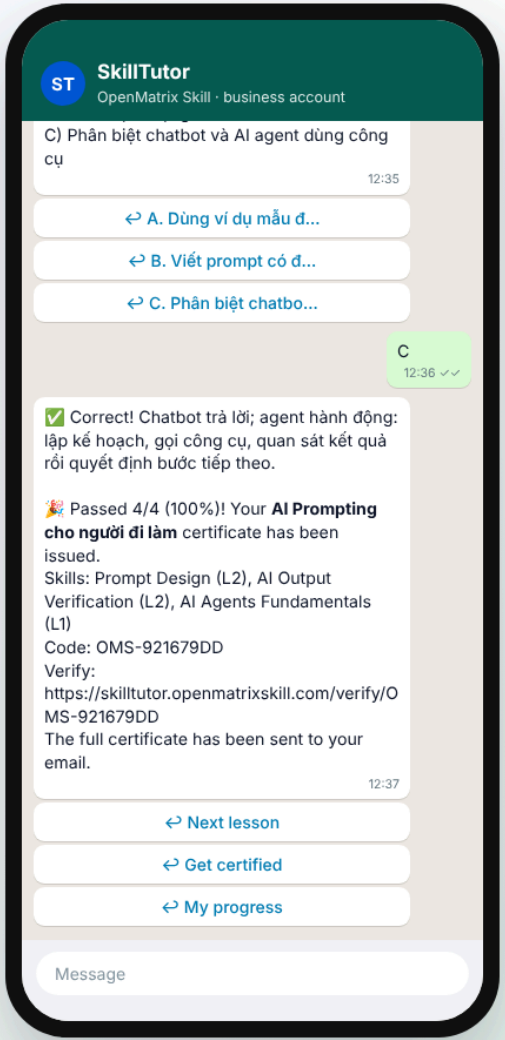

Certification quiz with list/button answers; graded by the agent's tools, not by the model.

AWS End User Messaging Social · WhatsApp

Certification quiz on WhatsApp

Certification quiz with list/button answers; graded by the agent's tools, not by the model. Pass → a verifiable skill certificate.

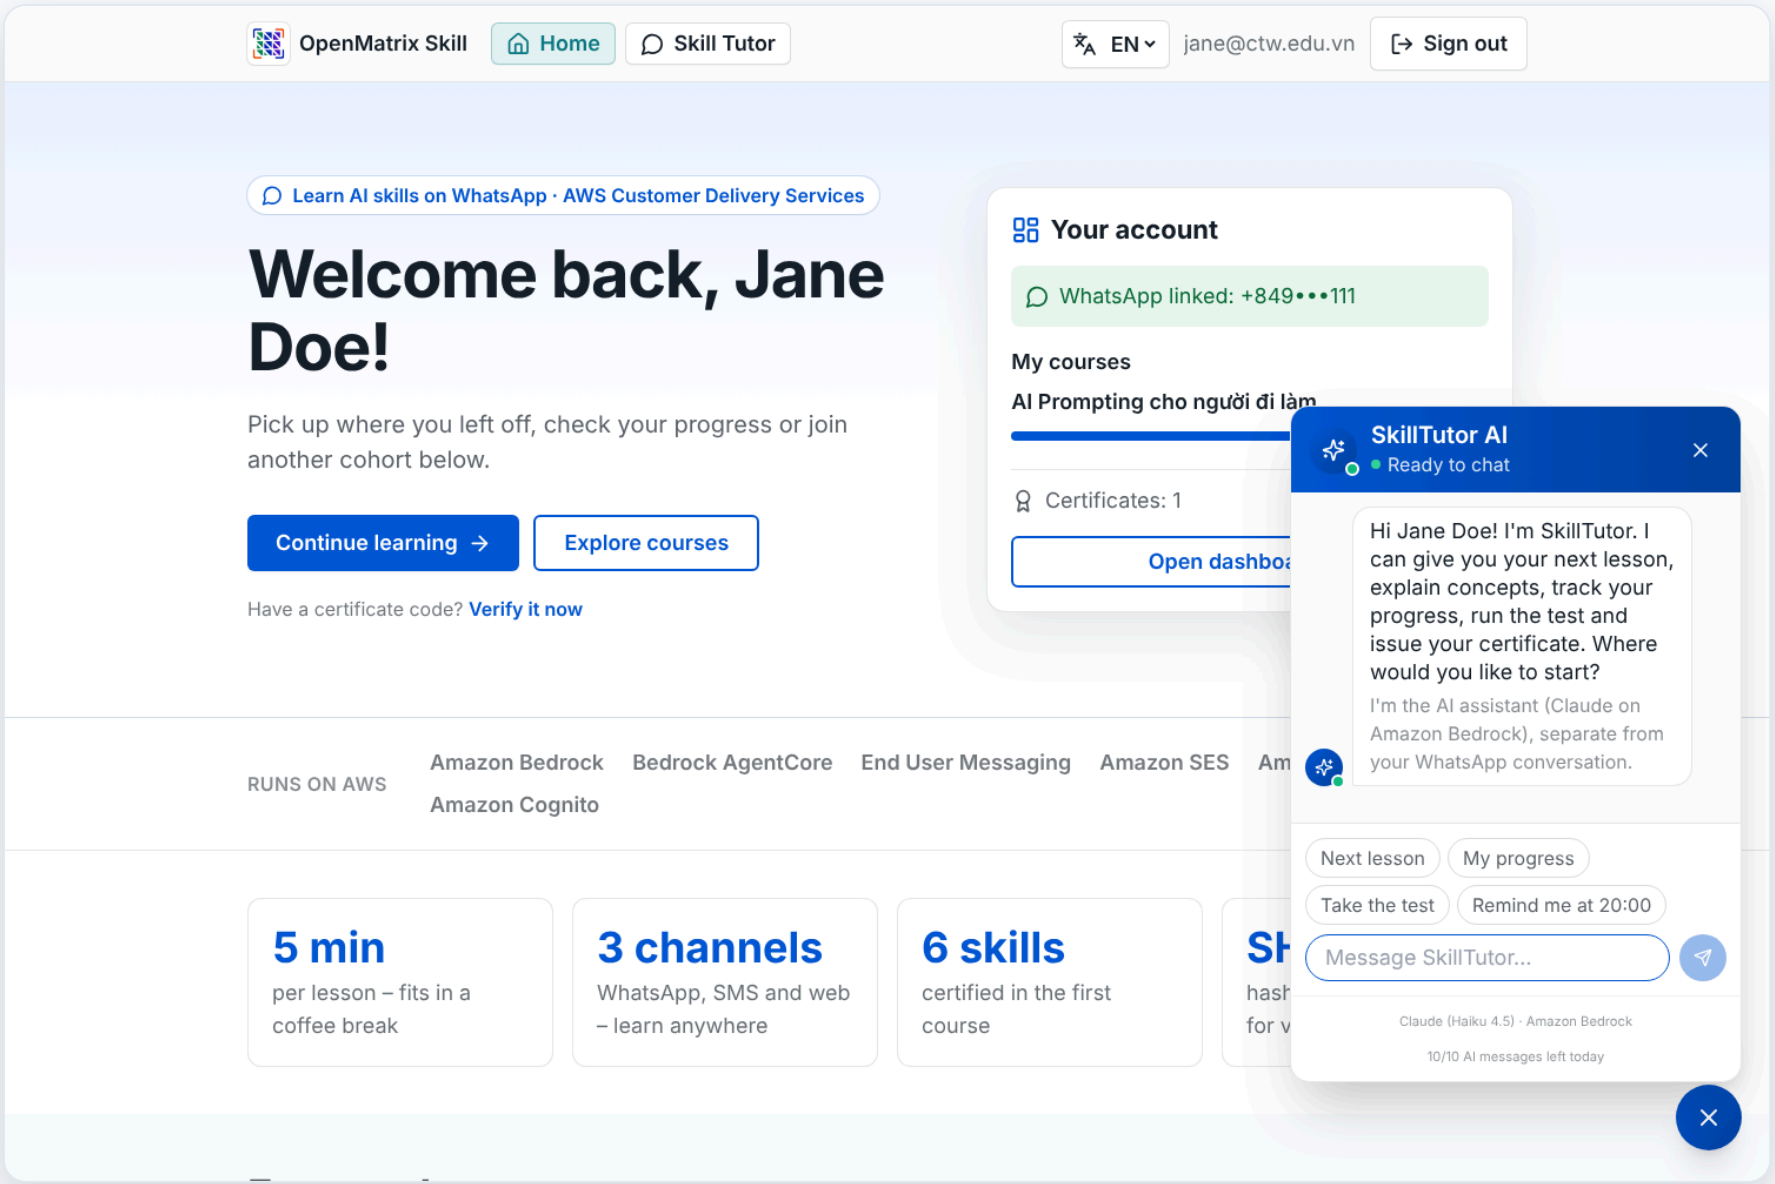

Rendered from the exact message payloads SkillTutor sent with SendWhatsAppMessage in a dry-run session (demo course).

06

SkillTutor AI chat

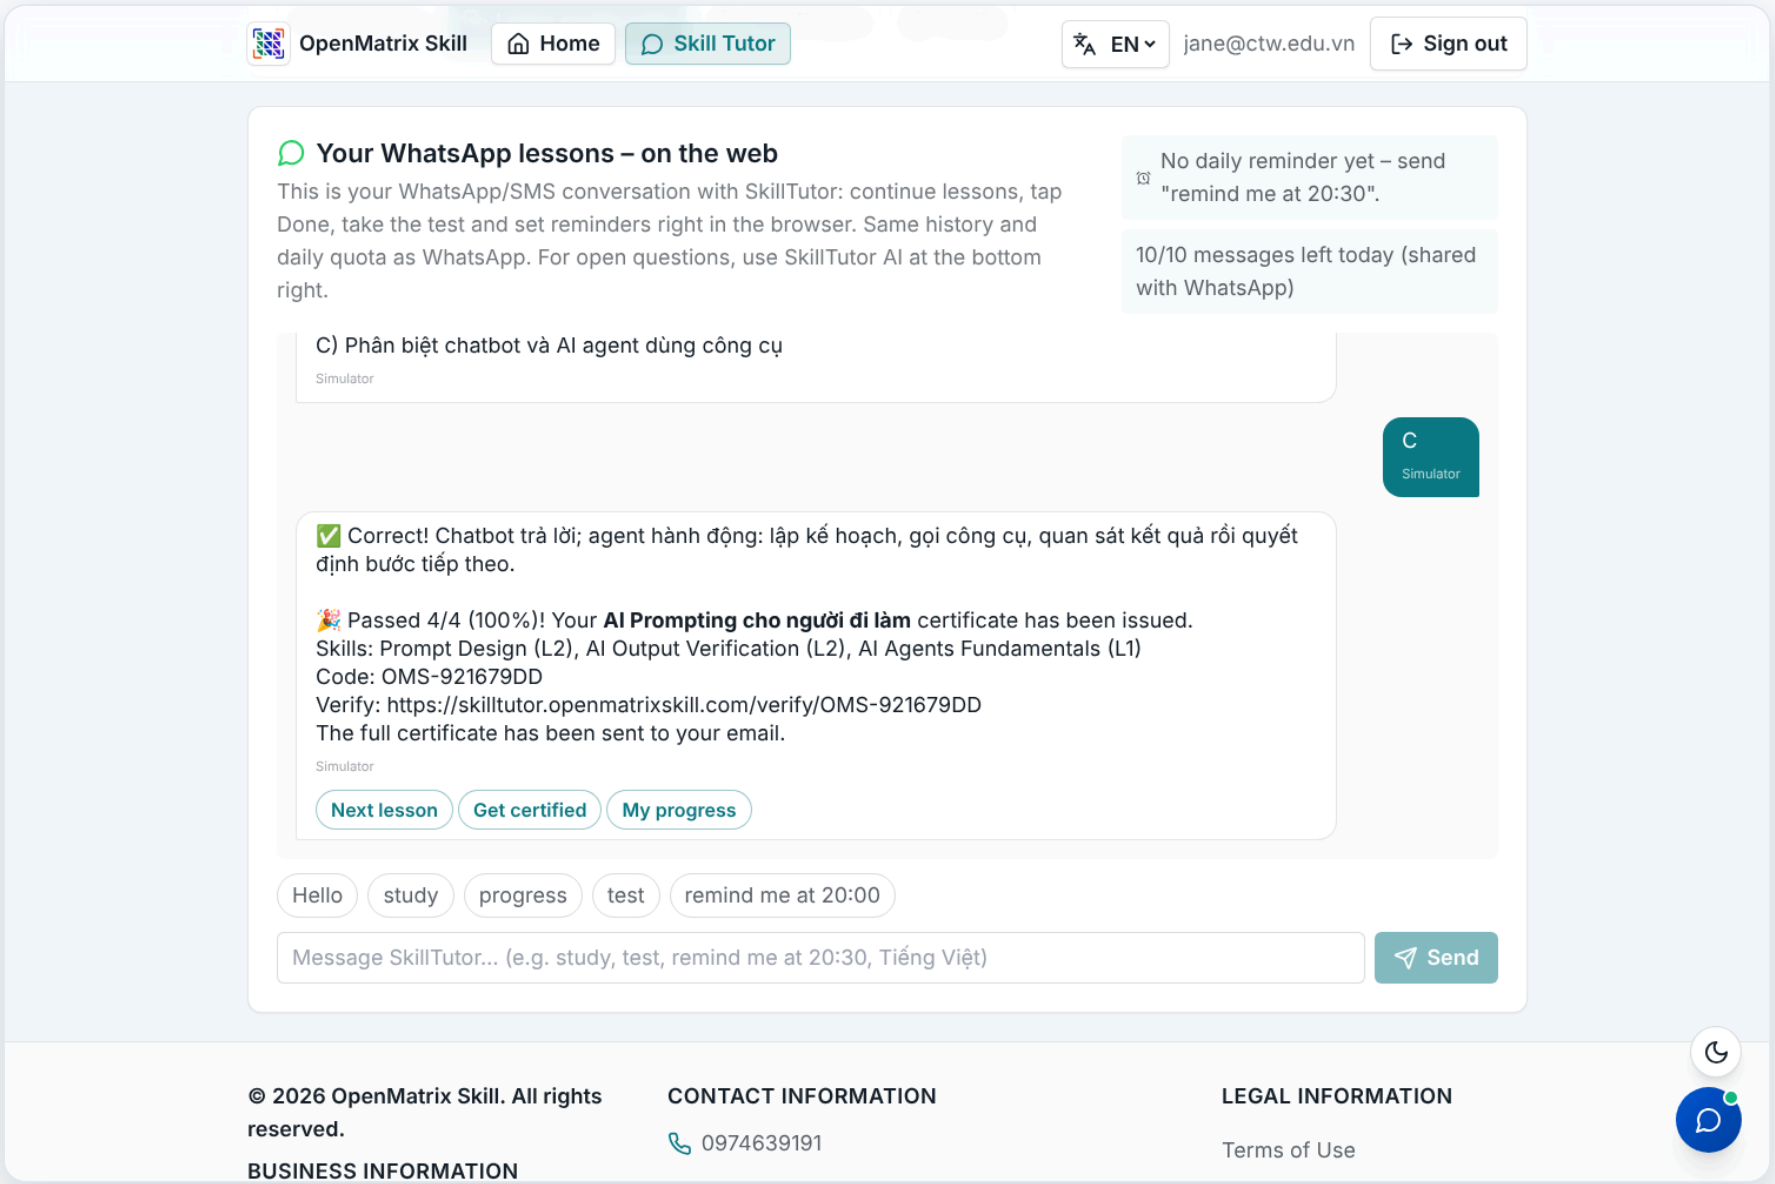

Claude Haiku 4.5 on Amazon Bedrock answers open questions, 10 AI messages per learner per day.

07

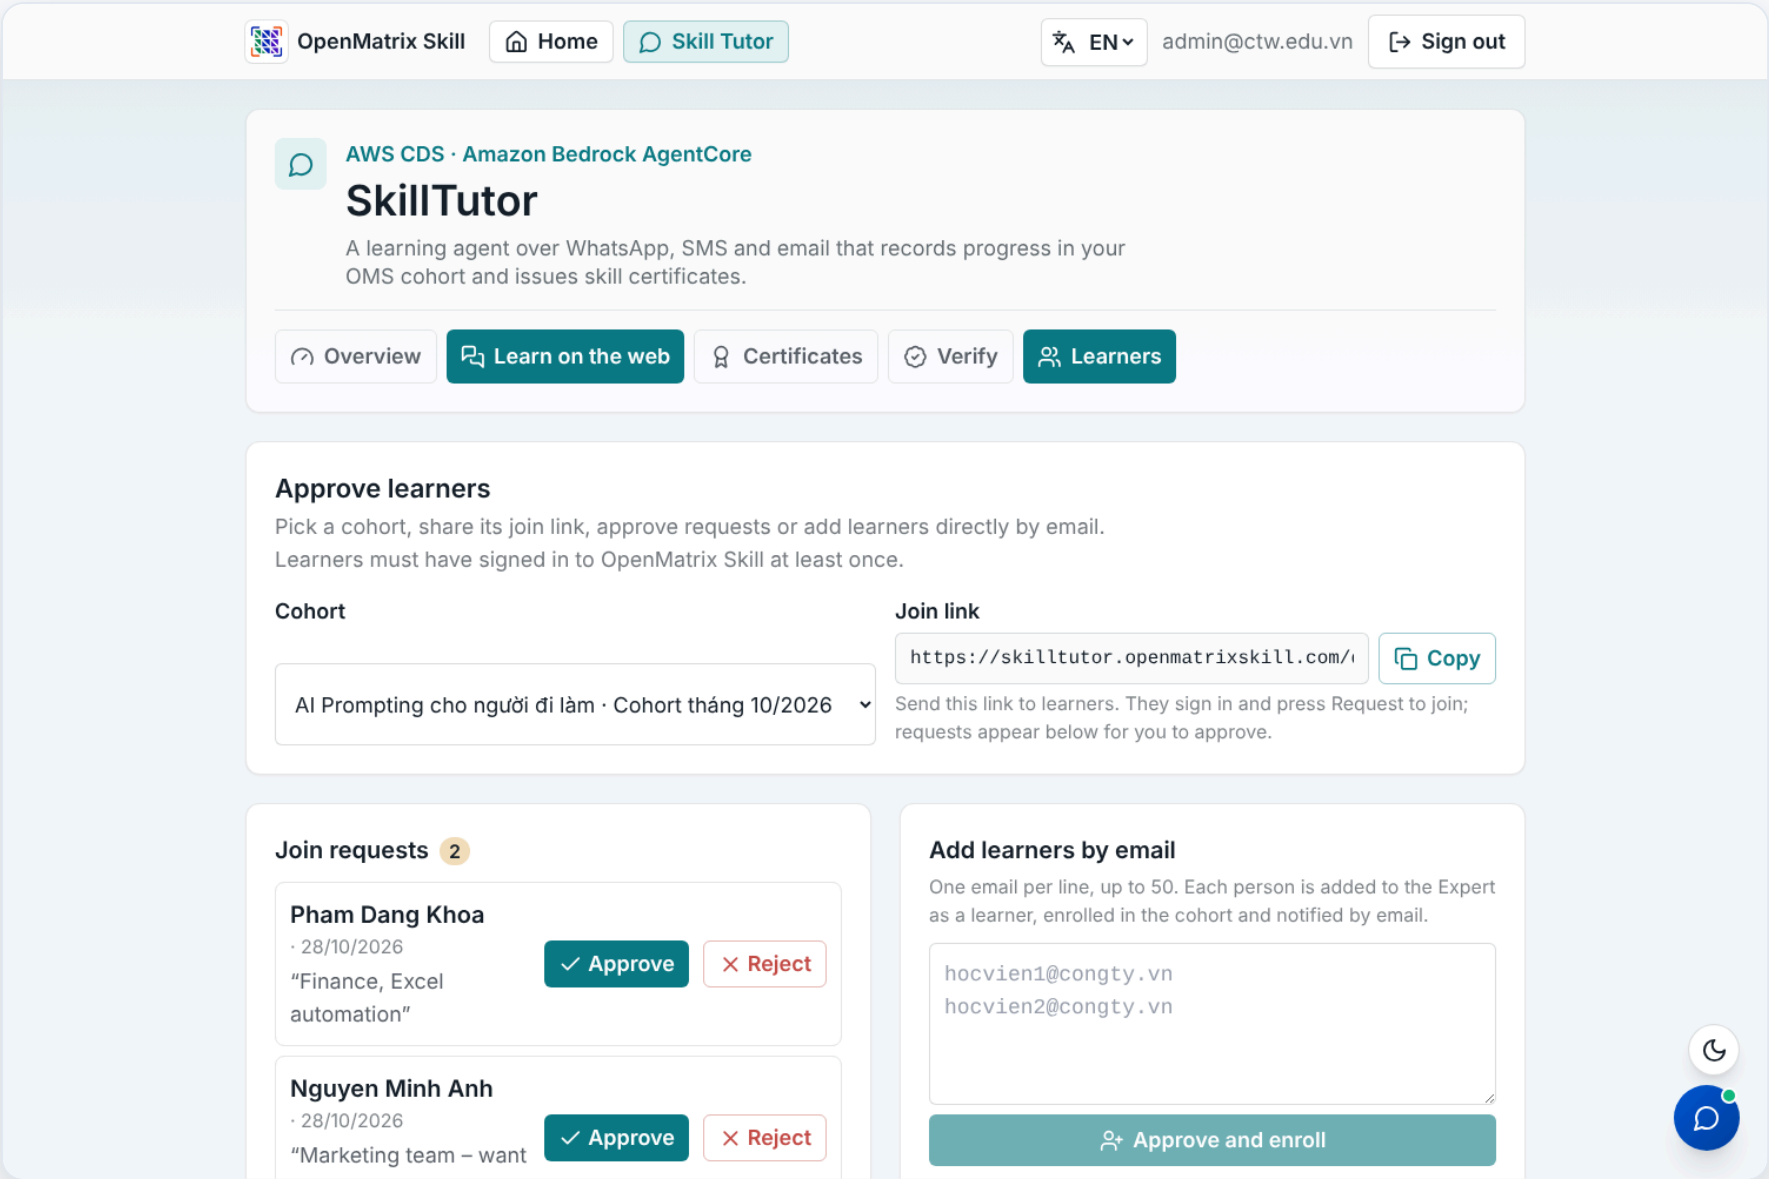

Learn on the web

The same WhatsApp conversation, continued in the browser.

08 Learner approval (admin)

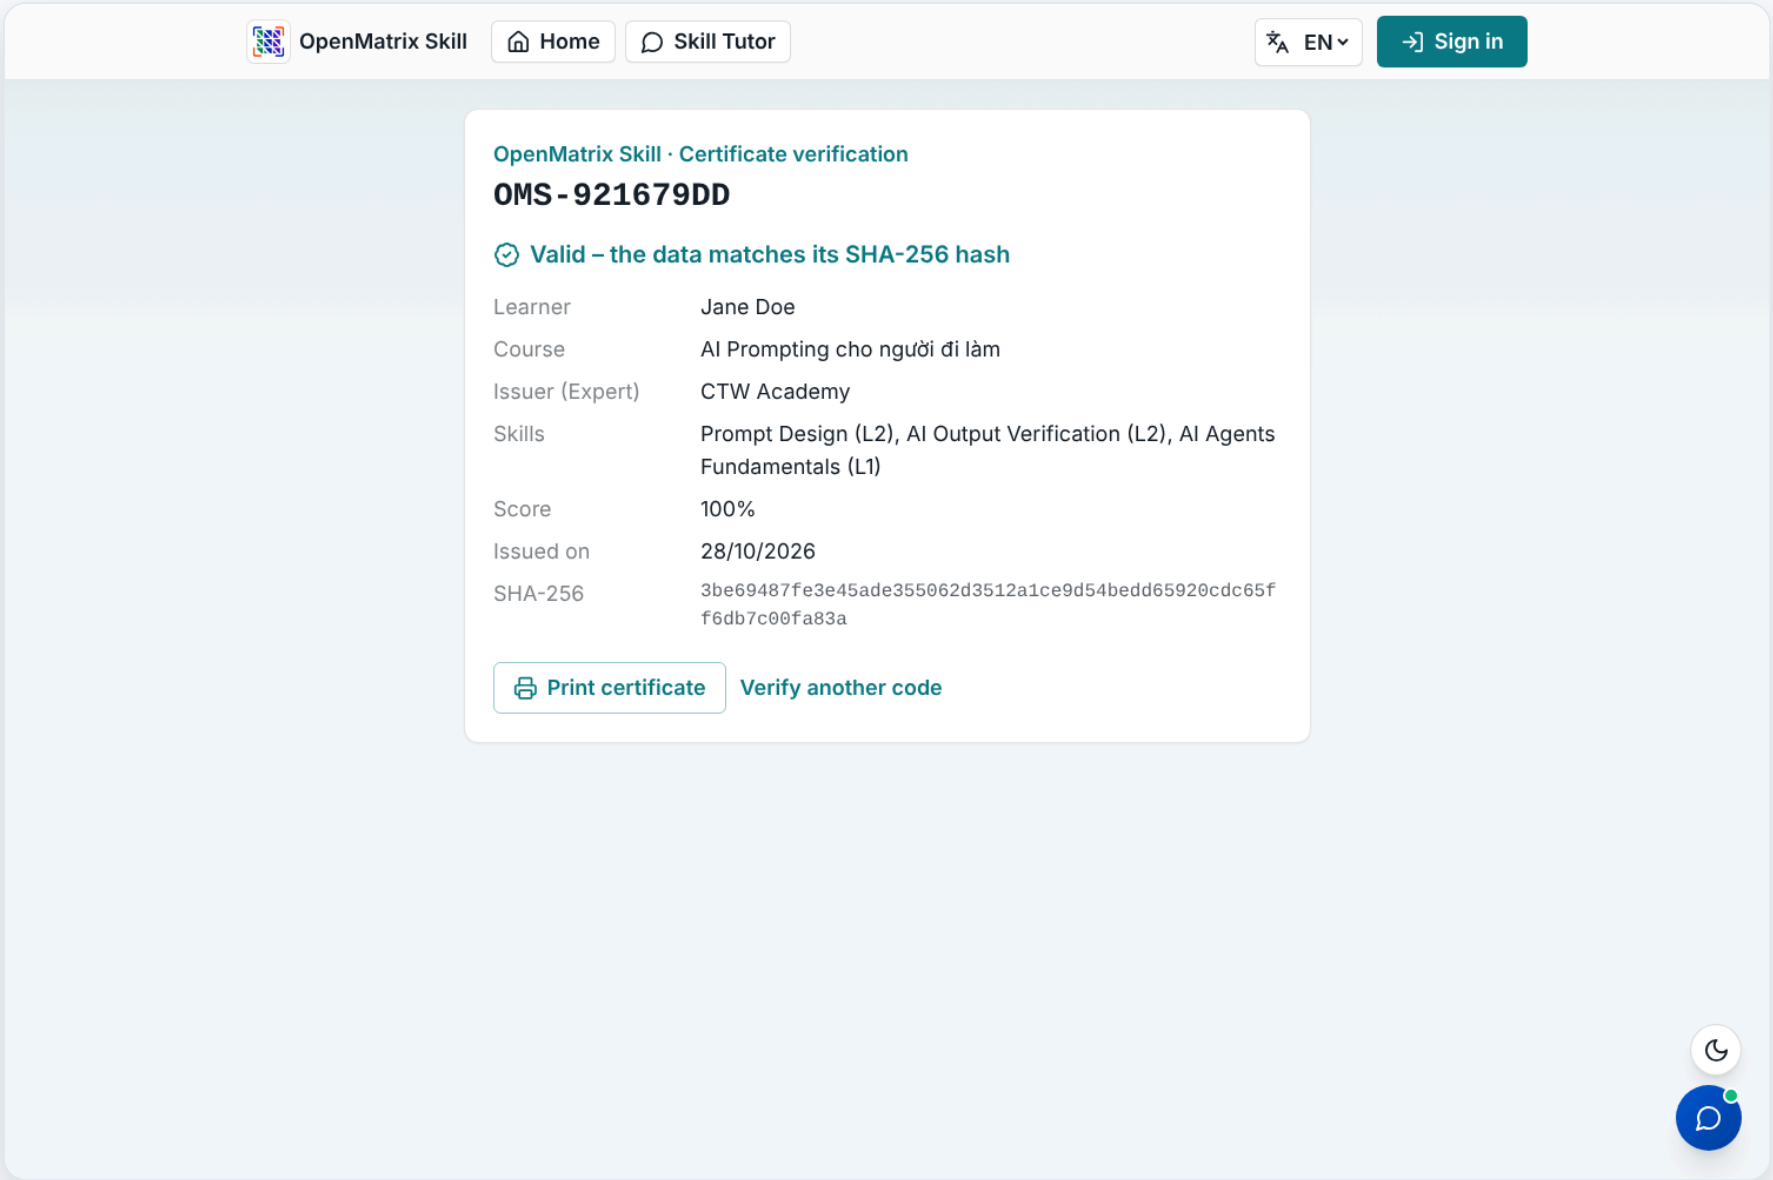

Experts approve join requests or add learners by email.

09

Certificate verification

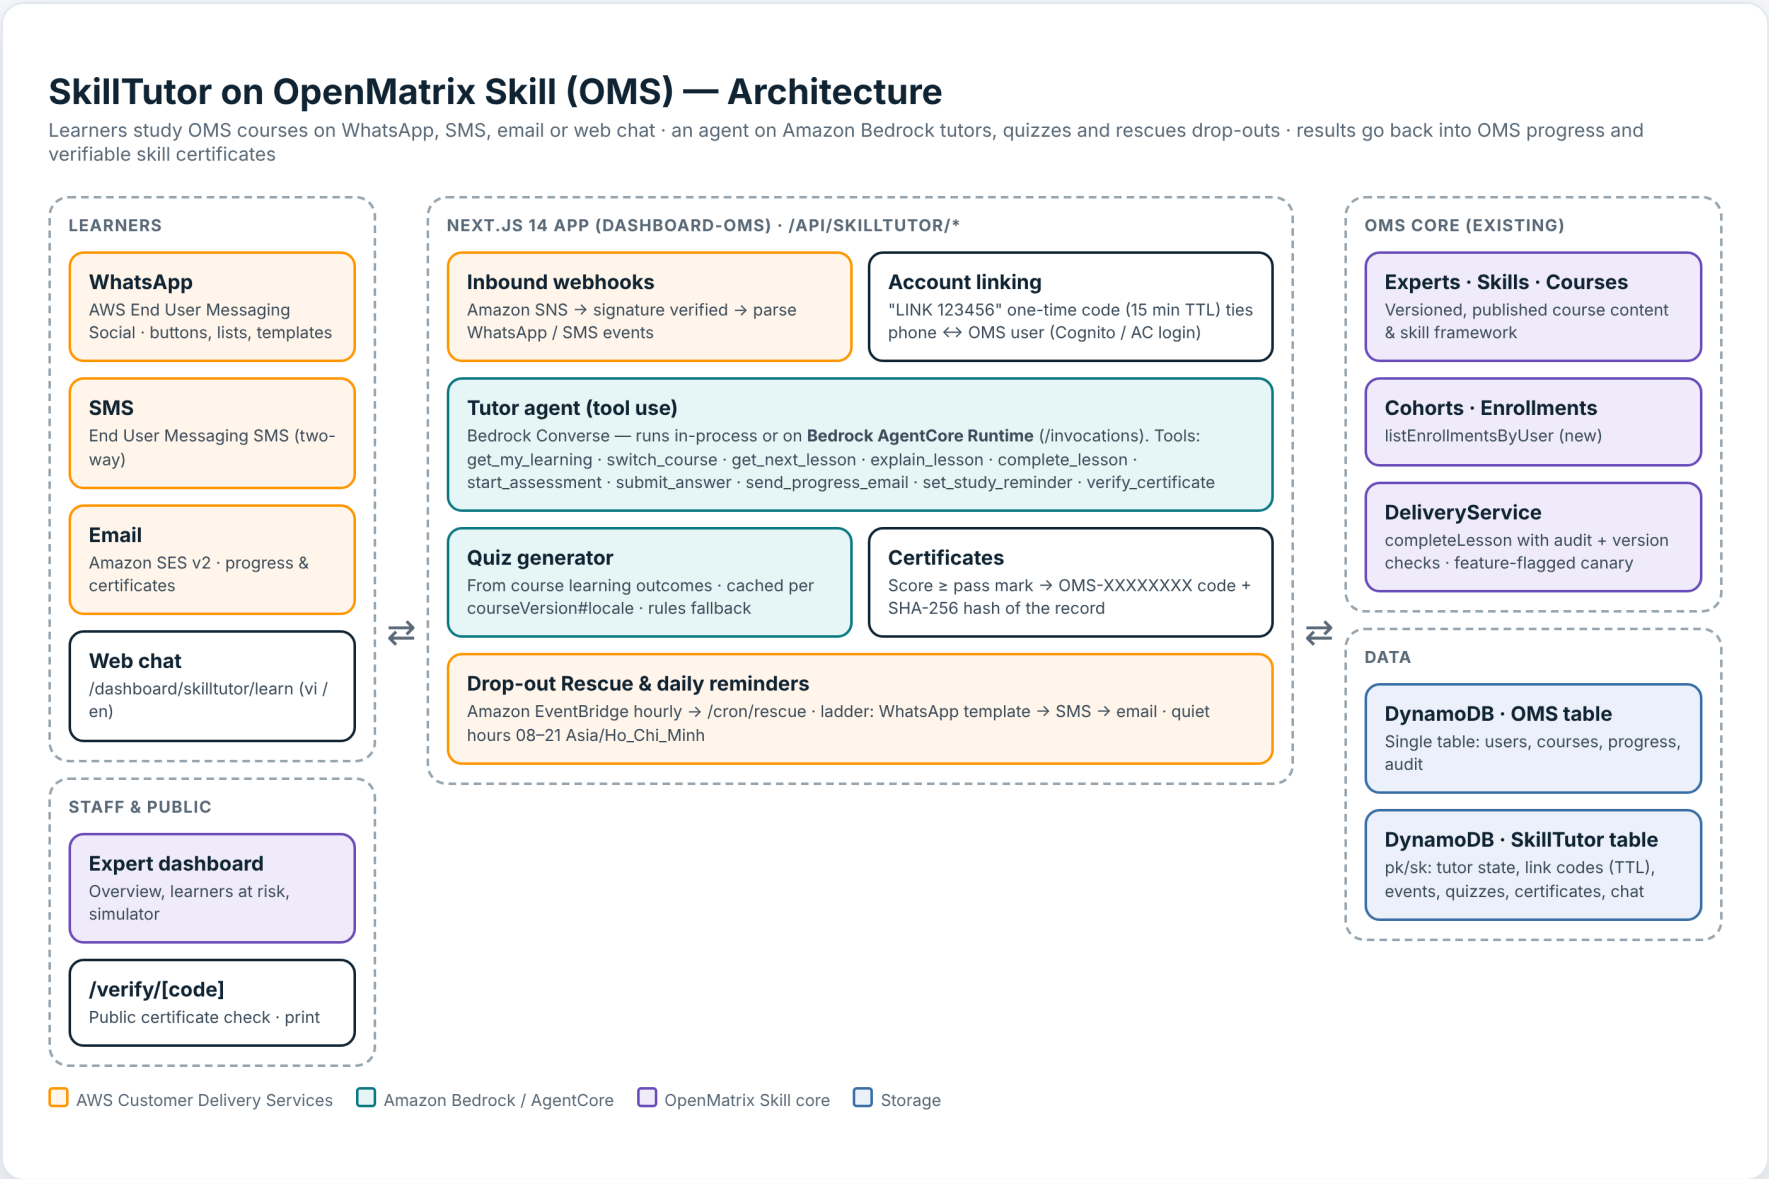

OMS-XXXXXXXX code + SHA-256 hash, verifiable by employers on the web or via WhatsApp.

10

Architecture

SkillTutor on AWS: End User Messaging (WhatsApp, SMS), SES, Amazon Bedrock / AgentCore, DynamoDB, Cognito.

Notes

- Screens 01–03 and 06–09 were captured from the running app with its demo dataset (CTW Academy demo course, sample learners).
- Screens 04 and 05 are rendered from the exact message payloads the app sent with `SendWhatsAppMessage` during a dry-run session; button titles are cut at 20 characters as WhatsApp does.
- Screen 06 shows the assistant configured for Amazon Bedrock before the first question.
